

Some facts about me are:

- Eagle Scout 1985.
- Graduated Alta High School 1988.
- Served an LDS mission in the Denver Colorado area 1993-1995.
- Associate of Science in Business at Salt Lake Community College 1998.
- Business Management B.S. degree from The University of Utah 2003.
- State Republican delegate 2006.
- Planning commissioner for Midvale Planning Commission appointed by Mayor JoAnn Seghini 2011-2013.
- Partner and Secretary/Treasurer of Mountain West Pipe and Supply in South Salt Lake 2005 - Present.
- Currently serving as a Scout Master in our local troop.
- Proud husband of 22 years/father of 3 crazy kids.
- Cottonwood Improvement District Board Trustee January 2016-Present.

"There are many upcoming challenges facing the district as the Central Valley Reclamation Facility continues its rebuild. My goal is to keep their spending in check as they proceed. The rebuild is a requirement by the EPA but can be done efficiently and with prudence."

I'm ***Wesley Fisher***, running for one of the trustee positions for the Cottonwood Improvement District. I feel it's a privilege and an obligation to serve in our community where I can make a difference. I have had the privilege to represent you over the past three years as one of the trustees of the three member board. I have learned a lot about our collection system and what it takes to manage it. I have gone through board training and have been to several industry conferences to learn more about collection and reclamation systems. I feel the past term has been full of meaningful dialogue with you, the patrons, and I strive to listen and implement new ideas I believe will help the district.

We have implemented a more transparent attitude by giving the constituents more information at the board meetings and listening and implementing good ideas. I feel I have been responsive and sensitive to the needs of the district and the needs of patrons as costs have been rising. The district is very well run and partnering with the management team has reduced the number of employees and equipment needed which has led to operating costs being reduced. The district still maintains a collection system with no backups and has kept rates low. Many other districts come to train with our employees to mirror what this district has been able to achieve.

Your support will help me keep everything ***flowing*** in the correct direction.

Thank you,

Wes Fisher
